

PRESS RELEASE

THE LARGEST COMBINED EXHIBITION TOOK PLACE IN GREECE FROM 19-22 MARCH 2010

The simultaneous organization of four interrelated exhibitions organized by "3EK ORGANIZATION OF EXHIBITIONS" in Athens, Greece from 19-22 March 2010 at brand new exhibition center METROPOLITAN EXPO was crowned with great success.

450 companies from Greece and other countries and more than 17000 trade visitors attended our four exhibitions,

SYSKEYASIA 2010, 12th International Packaging, Machines, Printings and Storage exhibition,

PLASTICA 2010, 8th International Plastics, Machines & Molds exhibition,

CHEM 2010, 8th International Chemistry and Biotechnology Exhibition and

ECOLINK 2010, 2nd International Environment, Water and Recycling Exhibition.

In the 4 days of the exhibitions, the organizers with their excellent services and organization at the most functional and most accessible exhibition center in Greece gave the opportunity to the exhibitors to present their products and services and meet with many old and new customers.

The latest achievements and technologies were well shown in the fields of packaging and plastics machines, molds and automation, packaging materials and printings, storage and logistics systems, consumer products, raw materials and finished plastic products, chemical products and equipment, biotechnology, environment, water processing, and recycling.

Despite the difficulties of the general economic environment prevailing at this phase in the Greek market and trade, the conduction of the largest combined exhibition offered the exhibitors the opportunity to make good contacts and discussions with trade visitors of high interest, purchasing proposals and closing agreements and deals.

The results for the exhibitors will become bigger for them if in the next few months if the various Government and European Union investments programs are materialized.

In parallel with the exhibition, the following successful day conferences took place at the exhibition center.

- "1st Symposium of plastic products and plastic packaging materials" organized by the Hellenic Association of Plastic Industry on Friday March 19th
- "New trends in food chemistry", organized by the Hellenic Union of chemists and the Hellenic Union of Food Technologists on Saturday March 20th
- "The secondary packaging in the supply chain", organized by the Journal Supply Chain & Logistics on Monday, March 22nd

The next edition of our combined exhibition is scheduled at METROPOLITAN exhibition center in Athens, Greece on 17-22 February 2012.
